(54) Title: METHOD OF PROVIDING SERVICE FOR USER EQUIPMENT AND SYSTEM

The invention is related to a method and a system of pro-viding a service (218) associated with a media stream (216) tor user equipment (202). The system comprises a server (210) connected to a communication network (200) for providing the service (218) using the radio interface of the communication network (200). The system further comprises a broadcast system (204) for providing the me-dia stream (216.) Associating data for associating the me-dia stream (216) with the service (218) is transmitted from the system to the user equipment (202). The associating data is received, and the system is configured to provide the user equipment (202) with the service (218) by using the associating data.
